

# A liver transplant gave Sonia her life back.

Sonia, liver recipient

In the fall of 1996, Sonia was diagnosed with end stage liver disease. The most difficult thing for her to accept was that she was no longer able to drive herself. Now she is driving again and has taken up a new hobby, making rosary beads which are distributed to people around the world.

You have the power to Donate Life.

Be an organ, eye and tissue donor.
